NON-FINAL ACTION

1. The applicant's Preliminary Amendment filed 30 MAR 06 has been entered. Following the entry of the Preliminary Amendment, **Claim(s) 1-12** is/are pending.

SEQUENCE RULES

2. This application complies with the sequence rules and the sequences have been entered by the Scientific and Technical Information Center.

35 USC § 101

3. 35 U.S.C. § 101 reads as follows:

"Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title".

CLAIM REJECTIONS - 35 USC § 101

4. **Claim(s) 1** is/are rejected under 35 U.S.C. § 101 because the claimed invention is directed to non-statutory subject matter. Claim 8 is nonstatutory because "the use of" is not a patentable category under 35 U.S.C. § 101.

Please note that for the evaluation of Claim 10 against the prior art the examiner has interpreted Claim 10 as follows :

35 USC § 112- 2nd Paragraph

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

CLAIM REJECTIONS under 35 USC § 112- 2ND PARAGRAPH

5. **Claim(s) 7** is/are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 is indefinite in that it recites the phrase "several times". This is a relative term and therefore the metes and bounds of what is intended cannot be determined. Please note that for the evaluation of Claim 7 against the prior art the examiner has interpreted Claim 7 as follows :

7. The method according to Claim 1, further characterized in that steps a) and b) are repeated one or more times.

Prior Art /Reason for Allowance

6. **Claims 1-12** appear to be allowable over the prior art of record because the prior art considered does not teach or reasonably suggest the method for detecting methylated or unmethylated DNA as recited in Claims 1 and 12. In particular, the closest prior art Berlin [WO03/80862(NOV 2003)] or Berlin et al. [WO02/072880(SEP 02)] do not teach or reasonably suggest, either alone or in combination with the other prior art considered, the method for detecting methylated or unmethylated DNA as recited in Claims 1 and 12.

Conclusion

7. Claim(s) 1-6, 8-10 and 12 is/are allowable while **Claim(s) 7 and 11** is/are rejected and/or objected to for the reason(s) set forth above.
